This documentation, including all files referenced herein and in particular the PCB fabrication data, schematics, design files, firmware, software source code, and any associated materials (collectively, the "Materials"), is provided by the copyright holders and contributors "as is". The Materials are made available solely for personal, educational, research, and non-commercial purposes. Any commercial use, commercialisation, sale, distribution for profit, incorporation into commercial products, or use in support of commercial activities is strictly prohibited without the prior written permission of the copyright holders.

Any express or implied warranties, including, but not limited to, the implied warranties of merchantability, fitness for a particular purpose, non-infringement, and freedom from hidden or latent defects, are hereby disclaimed. In no event shall the copyright holders, contributors, or licensors be liable for any direct, indirect, incidental, special, exemplary, consequential, or punitive damages (including, but not limited to, procurement of substitute goods or services, loss of use, data, property, profits, revenue, goodwill, or business interruption) however caused and under any theory of liability, whether in contract, strict liability, tort (including negligence), or otherwise, arising in any way out of the use of the Materials or any device manufactured therefrom, even if advised of the possibility of such damages.

No guarantee or representation is made regarding the accuracy, precision, completeness, reliability, safety, performance, or suitability of any measurements, calculations, specifications, data, or other information contained within the Materials. Any use, manufacture, modification, testing, or operation of devices based on the Materials is undertaken entirely at the user's own risk and responsibility.

Third-Party Software and Components

This package includes or references third-party software and components. Such third-party materials remain the property of their respective copyright holders and are distributed under their original licenses.

In particular, the redistributed *bootloader.bin* file is the Arduino® Nano 33 BLE Sense bootloader and remains subject to the applicable Arduino license. The original source is available at <https://github.com/arduino/ArduinoCore-mbed>.

The compiled firmware provided with the mBarograph incorporates software components from the Arduino® (<https://www.arduino.cc>), Adafruit (<https://www.adafruit.com>), and Waveshare (<https://www.waveshare.com>) ecosystems. These components remain subject to their respective licenses and copyrights. No unmodified third-party source code is redistributed as part of this package, except for the Arduino® bootloader binary described above.
